# MINIRAMPS FOR URBAN SPORTS

Miniramps are facilities that work well both as essential obstacles for any park and as stand-alone free-standing devices. They are designed for both beginners and advanced users. The running element is made of waterproof, frost-resistant and non-slip Rampline matting, characterised by high resistance to weather conditions and mechanical marks caused by daily use. Thanks to the use of this technology, the running material of the miniramp has a structure that provides users with excellent grip and comfort while riding. The design, which complies with current standards, ensures stability and safety in use. The growing popularity of urban sports and their presence at the Olympic Games underline the importance of modern technology in miniramps, making them an ideal choice for both amateurs and professionals.

\*The width of the safety area depends on the dimensions of the miniramp

## MINIRAMP95

Code: M924 / Dimensions: 0,95 x 2,4 x 7,9 m
