HOW TO WORK WITH INCLUSION

BARRIER-FREE PLANNING AND EQUIPMENT

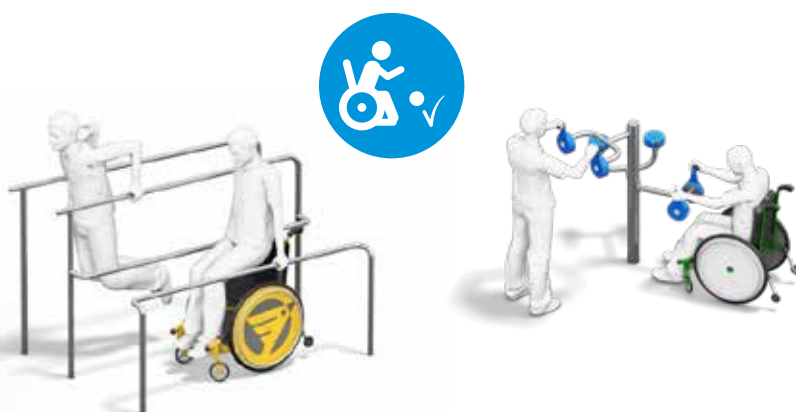

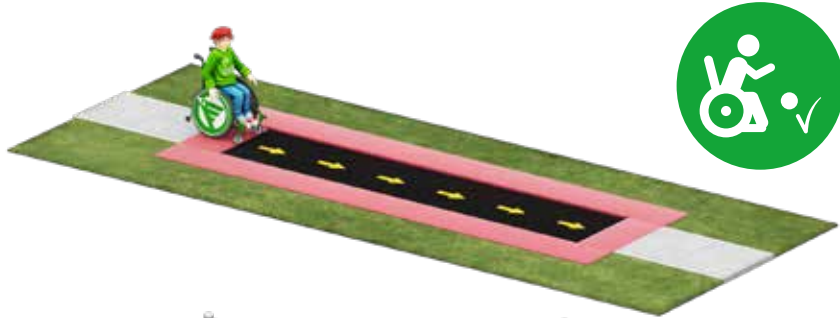

Our take on inclusion

100% the same fun, exercise, games and fitness

People with disabilities are fully-qualified members of society and want to be recognized as such.

Nobody wants to be isolated and excluded by a separate "play-ground or fitness area for the disabled". Our aim is for inclusive equipment to be a standard feature of play and sports facilities. For this reason we have also decided to integrate the inclusion program into the existing range when designing the catalog.

WELCOME

NEOLINI®

In cooperation with educators, we have developed **NEOLINI®** and applied our many years of knowledge about safe play and movement to an innovative playroom concept that uses the (room) height and requires little floor space and no fall protection.

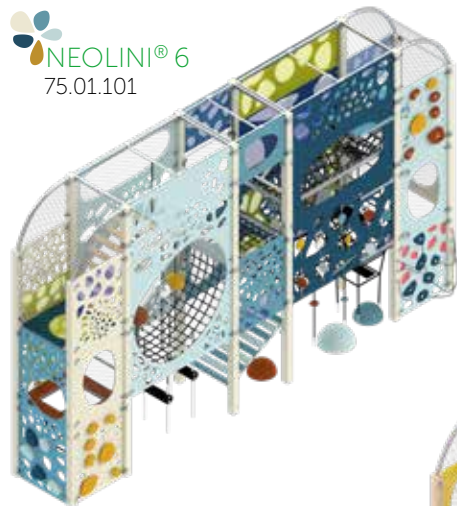

Due to the modular construction and diversity in design and equipment, an individual configuration is possible for every budget and for every room.

NEOLINI® is the space-saving solution for robust and sustainable indoor and outdoor play areas, using mainly renewable raw materials as well as durable and 95% recyclable materials. We have pre-compiled five models full of play value for typical room situations.

YOUR PLAYGROUND CONSTRUCTION KIT

The most popular playground equipment series **ETOLIS®**, **HARENA**, and **FRISIA** are optionally available with posts made of wood, stainless steel or powder-coated stainless steel and can be extended with the other modules of the **KIT+ system**.

FLOORS

ROOFS

PLAY TABLES

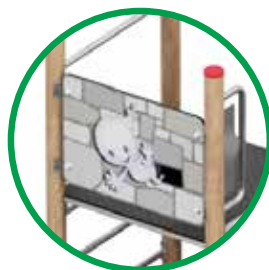

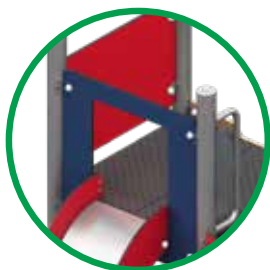

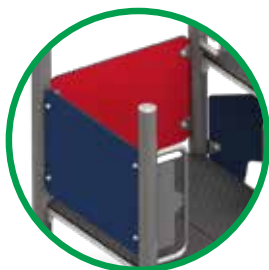

KIT+ SYSTEM

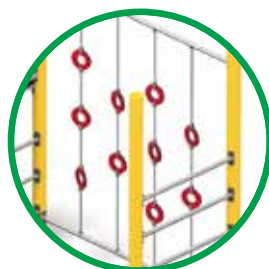

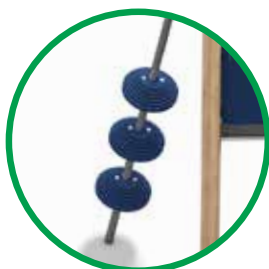

Thanks to the modular structure of the **KIT+ system**, individual designs of age-appropriate and safe play structures in various sizes and designs are possible. Various parapets, facades and roofs are available for the design of play equipment with the **KIT+ system**. Climbing elements, ramps, ladders or connecting bridges can also be individually planned.

HARENA

Experimental play with water and sand is one of the favorite pastimes of young children. Shoveling, building, transporting, splashing and all that with their own hands. As master builders, crane operators or gold diggers, children from 1 to 6 years of age enjoy being physically as well as creatively active for a long time. Forgetting about themselves, creating their own world and playing different roles in it is a paradisiacal state for children.

BALANCING + MOVING

FOR KIDS FROM 3 TO 99 YEARS

"Wittmund" and "Leerhave" is a classic playground equipment which promotes movement and coordination skills. To adapt this item to needs of people with developmental disabilities, we have optimized it. Each single element has guard rails in a different colour to make them easy to distinguish from each other. Different difficulties are a growing challenge. If the challenges are perceived as too difficult, the equipment can be safely and easily left at each stationary platform.

SAFARI-PARC

BALANCING AND MOVEMENT

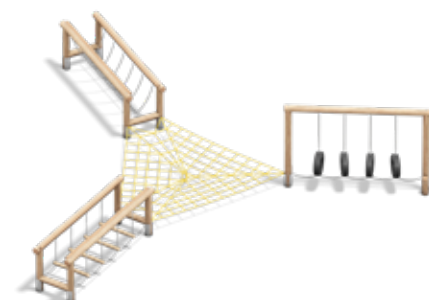

The exciting Safari Parc is a great idea for every playground and schoolyard. Many of the single items have a free fall height of less than 60 cm. This allows installing the devices on a sealed surface. All units of our popular Safari Parcs are equipped with post shoes, which ensures a long life expectancy. The posts are made of untreated larch wood and are planed as well as core cut. All moving parts are attached to hot-dip zinc chains. Put together your own Safari Parc course. You can combine all items any way you like.

SLACKLINE + BALANCING ROPE

Slackline is a popular sport, which is very similar to tightrope walking, but is practiced on an 8 cm wide webbing. In contrast to balancing on a tightrope which is stretched so tightly, that it hardly moves, a Slackline stretches under the weight of the Slackliner. This makes balancing very dynamically and requires continuous active balancing. Slacklining requires a combination of balance, coordination and concentration.

The unit is delivered pre-assembled on a concrete slab (4m) or on a T-beam (6m).

PLAY AND GAME TABLES

DESIGNED BY MANFRED WEBEL

Manfred Webel

1965 born in Paderborn ...

As a sculptor, he is fascinated by the question of how art can make a contribution to human society. Being a father of three sons himself, the artist is committed to children and young people with great joy. He has made a name for himself nationwide as a designer of play objects in a short time. This comes as no surprise, as he keeps involving future users in the development process.

„When I first created the table, I was surprised to find that there are only a few really nice gaming devices that work and have a lot of fun at the same time. Since then, I have been building objects with flowing forms and cheerful colours that offer open design possibilities and promote creativity and perception.“

Manfred Webel

9 Wins

For vital schoolyards I developed „9 wins“ together with my youngest son. Most important here: concentrated aiming, calm throwing, quick calculation. Because only the one who adds up to exactly 9 points can win. Thrown too many points? These are simply deducted. Playing with two & four people or in teams - it's always great fun. Older children like variations that involve multiplying and dividing.

SPLASH, that's the little puddle for the creative way of messing around. With a bucket of water, **SPLASH** becomes a lake where kids run boats. With a pile of sand they build dams and form a river delta, which they flood the next moment.

CAROUSELS

LUUPZ® - CAROUSELS FOR CHILDREN FROM 1 TO 5 YEARS

"LUUPZ® - go rounds" are children's carousels that bring maximum vitality and energy to the playground with minimal space requirements. On the child-friendly sized carousels, children playfully test, use and expand their body knowledge - for example by the funny pirouette effect. The simple geometric bodies are available in different materials (wood, stainless steel, HPL or EPDM in various colors) depending on the model. Due to the variety of colors and shapes, suitable LUUPZ® carousels can be found for every playground design to extend the play value.

CAROUSELS

BIG LUUPZ® FOR CHILDREN FROM 5 TO 99 YEARS

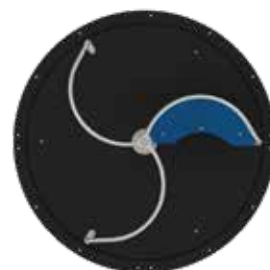

The new Big LUUPZ® carousel concept is the systematic technical development of the popular and proven PLAYPARC carousels for classic but also floor-level installation. With the unique Big LUUPZ® tub system (BLWS), which simultaneously serves as a foundation, the floor-level installation of all carousels is child's play. In the TIVOLI or BREAKDANCER models, the central post is designed as a self-propelled unit. The craziest Big LUUPZ®, however, is the Breakdancer, where the three LUUPZ® balls also rotate on the rotating main disc - like the real breakdancer at the circus.

SANDBOXES

SUPPORT CREATIVITY AND SOCIAL INTERACTION

For small children, a sandbox has an irresistible challenge character. From baking cakes to building castles is a sandbox with play sand the ideal stage to give room to individual creativity. If water comes into play, children between 1 and 5 years of age are hardly to be held. The wheel chair sandbox also offers children with disabilities the opportunity to take part in joint games as if they were their own.

The FAIRYLAND is a product line that additionally stimulates children's play due to its winding and non-symmetrical design. It is simply fun and joy for the dwarves to run, climb, slide and play

hide and seek. The FAIRYLAND product line is specially designed for children between 1 and 6 years.

PANTHEON®

The PANTHEON® is an icon on every playground. Due to the various climbing and chill elements, children between 6 and 12 years are inspired and challenged again and again.

The large arches are made of 140 mm steel tubing. The nets are attached without disturbing clamps and thus allow a very special climbing experience.

MODULAR ROPE NET PARCOURS

CLIMBING, RELAXING, BALANCING, SLIDING, COMMUNICATING, INTERACTING AND DESIGNING

Children need a place that inspires their senses and encourages them to play imaginative, free and spontaneous games. The flexible SERPENTES® modular system was developed according to this principle. SERPENTES® is a climbing equipment developed on the basis of physiological principles that promotes gross motor skills, the sense of balancing and the musculature and offers plenty of space for playing and chilling.

TRAMPOLINES

MOVEMENT + FUN

TRAMPOLINE FÜR MEHR FREUDE

Trampoline sind eine tolle Lösung für alle, die sich mit viel Freude bewegen möchten. Beim Trampolinspringen wird der gesamte Körper auf eine gesunde Weise trainiert, weil die Gelenke dabei kaum belastet werden.

TRAMPOLINES FOR MORE FUN

Trampolines are a great solution for those who want to move with a lot of pleasure. Trampolining is a healthy way to exercise the whole body, because there is hardly any stress on the joints.

MULTI USE GAME ARENAS

THE VARIABLE BALL SPORTS ARENA

Alle Multisportanlagen von **PLAYPARC** werden unter Berücksichtigung aller gültigen Sicherheitskriterien gestaltet, entwickelt und gefertigt. Sorgloses Spielen ist damit garantiert.

Selbstverständlich entspricht die Anlage den geltenden Normen - so wie alle unsere Projekte. Zum Einsatz kommen umweltfreundliche Materialien, die auch das Kriterium der Dauerhaftigkeit und Nachhaltigkeit erfüllen.

Es gibt unterschiedliche Standardgrößen und die grundlegende Möglichkeit, eine Multisportanlage mit oder ohne Kunstrasen-Spielteppich zu planen. Die Linien im Teppich sind eingelegt und somit besonders dauerhaft.

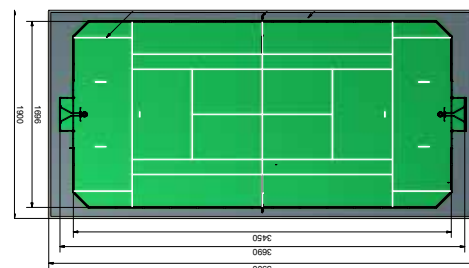

Die aus schalldämpfenden Material hergestellten Brüstungen haben einen Abschluss aus einem Aluminium-Sitzprofil, auf dem alle Zuschauer sitzen können – ein echter Treffpunkt!

All **PLAYPARC** Multi Use Game Arenas are designed, developed and manufactured in accordance with all applicable safety criteria. Carefree playing is thus guaranteed.

And of course, the plant - like all our projects - also complies with the applicable standards. Environmentally friendly materials are used which also meet the criteria of durability and sustainability.

There are different standard sizes, and the basic possibility to plan a multi-sport facility with or without artificial turf play carpet. The lines in the carpet are inlaid and therefore particularly durable.

The balustrades made of sound-absorbing material are finished with an aluminium seat profile on which all spectators can sit - a real meeting point!

INDIVIDUAL SYSTEM CONCEPTS

We would be pleased to create your individual multisport facility concept. Each location has its own challenges and objectives and we want to help you achieve sustainable use. Also the equipment will be provided according to your wishes and on the basis of all existing concepts, options and extras.

- A** 45° bevelled corners, additional side doors possible
- B** Basketball basket height adjustable, entrance through goal, goal with net
- C** High-quality artificial turf play carpet, with inlaid lines for a long service life
- D** Additional basketball baskets outside are possible
- E** Surface of balustrades as seat, perfect meeting point

A FITNESS MEETING POINT FOR EVERYBODY

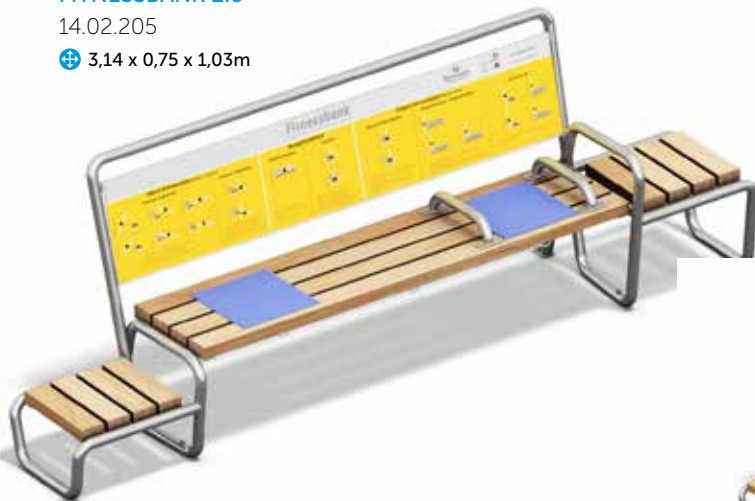

The innovative and patented **FITNESS BENCH** is the new trend in fitness and prevention for young and old!

With its functional design, it offers ideal training conditions for a varied fitness program in public spaces, such as in the city or in the park. The sport-scientific concept represents a multifunctional training device for different performance levels as well as a comfortable seating option for breaks, with which an attractive and low-threshold exercise offer is created area-wide.

FITNESS + SPORT

4FCIRCLE® FITNESS

Depending on their age, people move differently, have different motivations and individual needs for exercise. With the popular **4FCIRCLE®** fitness equipment, multifunctional sports facilities and special solutions for calisthenics, OCR or parkour, **PLAYPARC** has been setting innovative trends in modern sports facility construction for years. We are always pleased to be able to realize our customers' sporting visions, which promote health and are suitable and accessible for everyone.

CALISTHENICS

When designing sports and fitness areas, we place great value on multifunctionality, safety and inclusion. Our **CALISTHENICS** facilities offer active trend athletes optimal training conditions and create a sports venue where strength, endurance and flexibility can be trained - regardless of the individual performance level.

MORE FITNESS FOR EVERYBODY

MOBILPARC®

The innovative fitness trailer **MOBILPARC®** is quickly set up anywhere. The mobile outdoor solution for fitness and calisthenics convinces with its stable, robust construction and diverse training possibilities on 360°. With the illustrated instructions, a mobile outdoor gym is quickly set up, in which all muscle groups can be trained outdoors, at every location and at any time.

PARKOUR + OCR

For the growing communities and clubs of the modern individual trend sports **PARKOUR** and **OCR**, we plan multifunctional solutions for public spaces together with experienced athletes. With obstacle elements made of wood and steel and net structures, we build your OCR course exactly according to your needs and possibilities. The concrete modules of the ready to move parkour facilities were developed by German **PARKOUR** pioneers and offer optimal training conditions from cat-leap to roll.

4FCIRCLE® FITNESS

MORE SOLUTIONS FOR MOVEMENT

4FCIRCLE®

Pioneer of the new fitness movement

People's needs have changed dramatically. Everything seems to be getting tighter. Feel time and space shrink every day. Fitness, however, is more than ever one of the great wishes and goals of large sections of the population. And that regardless of age, gender or social background.

We want Fit, Free, Fun and Function: 4F!
Each course contains 100% of movement competence = maximum of function

4FCIRCLE® FITNESS

„Together with 4FCIRCLE® we have developed and realized the Calisthenics Park at the Olympic Base Frankfurt (Oder), an outdoor training facility for ALL our Olympians and squad/athletes, in the areas of coordination, dexterity, strength and endurance.“

Tino Buchholz - Projektleiter des Sportzentrums

WE GET PEOPLE ON THE MOVE

PLAYPARC has been getting people of all ages moving for over 40 years. We transform the needs of athletes into multifunctional sports facilities that are also suitable for many types of fitness.

We do not „sell“ products, but have developed sports and exercise concepts recommended by the DOSB (German Sports Confederation) and are at your side from the initial planning stage as an experienced partner for modern sports facility construction.

We will be happy to create an individually planned facility for you, which fulfills all your sporting wishes.

Olympic training base of the future

After a two-year planning and construction phase, the Calisthenics Park at the Frankfurt (Oder) site was opened on 16.6.2022. The sports equipment was assembled and designed in close coordination with the federal base managers. In a symbolic act, the head of the Olympic base and the sports center Wilfried Lausch, the mayor of Frankfurt René Wilke, the representative of the MBS Marcel Forch, the architect Jens Beige and Oliver Seitz, the representative of the company PLAYPARC released the course for the athletes of the Olympic base.

4FCIRCLE® FITNESS

„Das 4FCIRCLE®-Team entwickelt in enger Kooperation mit Projektpartnern und Kunden ganzheitliche Bewegungsräume für ALLE denkbaren Nutzergruppen: Alt+Jung, Dick+Dünn, sportliche + spaßorientierte Bewegter und Menschen mit eingeschränkten Fähigkeiten. Aus sportwissenschaftlicher und geräte-technischer Sicht entstehen so, auf Basis intensiver Nutzer- und Standortanalysen, Bewegungsparks und Calisthenicsanlagen, die exakt auf die anvisierte Nutzergruppe vor Ort abgestimmt sind.“

„The 4FCIRCLE® team develops in close cooperation with our project partners and customers, holistic movement spaces for ALL conceivable user groups, old+young, thick+thin, sporty + fun-oriented movers and people with limited abilities. From a sport-scientific and equipment-technical point of view, based on intensive user and site analysis, movement parks and calisthenics facilities are created, which are exactly tailored to the targeted user group on site.“

Oli Seitz

MORE FITNESS FOR EVERYBODY

4FCIRCLE® FITNESS

4F Strength

Force is the name given to those abilities which are necessary to overcome resistance through one's own muscle power or to hold it against gravity. Physical strength can be enhanced by regular training. Good power training equipment allows you to constantly increase your strength and work with your own body weight.

4F Coordination

Coordinative skills are those motoric skills that are necessary to carry out coordinated movements. By using good coordinative learning equipment, the basic coordinative ability is increased on the one hand and on the other hand they offer opportunities to learn special skills.

MORE MOVEMENT FOR EVERYBODY

4F Mobility

We call mobilization those measures that serve to promote and maintain the mobility of people. The use of good mobilisation equipment can permanently promote physical self-sufficiency and a positive attitude to movement and life.

4F Endurance

To increase endurance, activities are performed over a longer period of time. This raises the heart rate and boosts blood flow to the body, which strengthens the cardiovascular system. This has several benefits, such as improved lung function, lower risk of heart disease and stroke, better blood circulation, and an increased immune system.

**INDIVIDUAL
SOLUTIONS FOR
INDIVIDUAL
SPORTS**

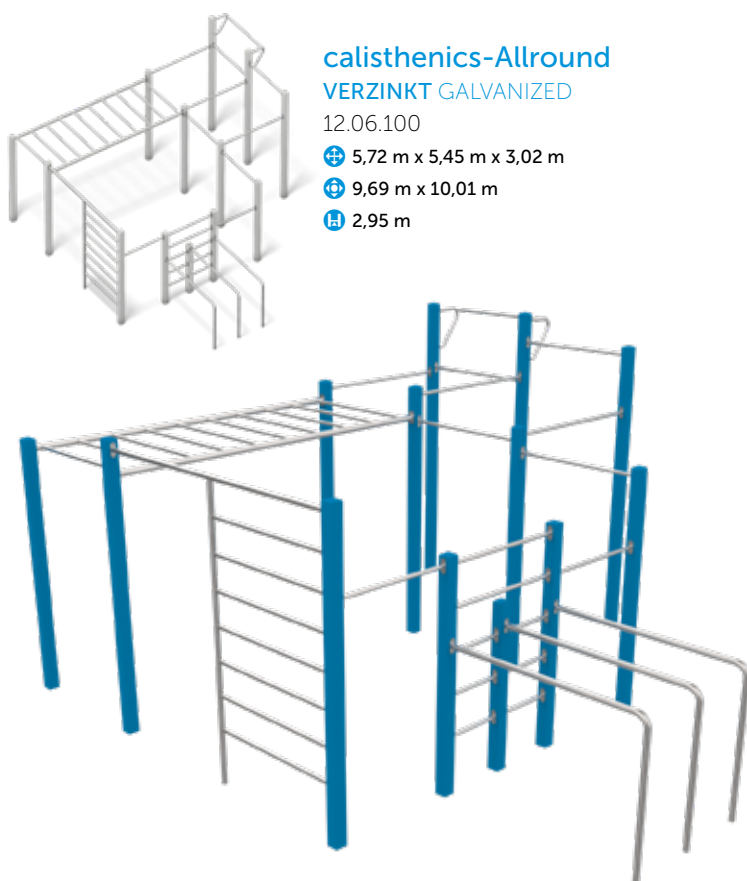

CALISTHENICS

Calisthenics is a full body workout without much technical effort! It includes very gymnastic strength and body exercises that are performed with your own body weight and sometimes with additional weights. Calisthenics is a very individual sport and so are our facilities: Create your own Calisthenics facility according to your needs and possibilities. We create your individual equipment so you can focus on the sport. Leave construction, safety issues and planning quietly to us.

Safety

Our Calisthenics systems comply with all safety standards (DIN-EN 16630 (in combination with an instruction sign) and DIN-EN 1176) required for use in public spaces. We are a member of national and international standards committees. A fall-damping floor covering is prescribed in the fall area of the system.

Individual design options

MATERIAL, colors and coatings

Posts: 10 x 10 cm square steel posts
CALI360° round posts made of steel - Ø 8,9 cm

Coatings: Galvanized (standard)
Duplex-coated
(Galvanized and powder-coated)

We use high-quality stainless steel tubes for the bars, ladders and all functional elements.

Individuality made in Germany

Our systems are tailored to the needs of the customer and therefore individual. Of course, there are certain standardizations in the dimensions that have been defined by Calisthenics athletes in order to offer the broadest possible user group optimal training and competition situations.

Many of our parks are unique and are manufactured in our production facility in NRW/Germany.

PARKOUR

READY-TO-MOVE

READY-TO-MOVE

Parkour pioneers Martin Gessinger and Ben Scheffler have put their 15 years of experience into the design of the ready-to-move (RTM) parkour facilities. The claim of the RTM facilities is to create places for parkour that are attractive for many years, regardless of the skill level of the traceurs.

PARKOUR FOR ALL

PARKOUR

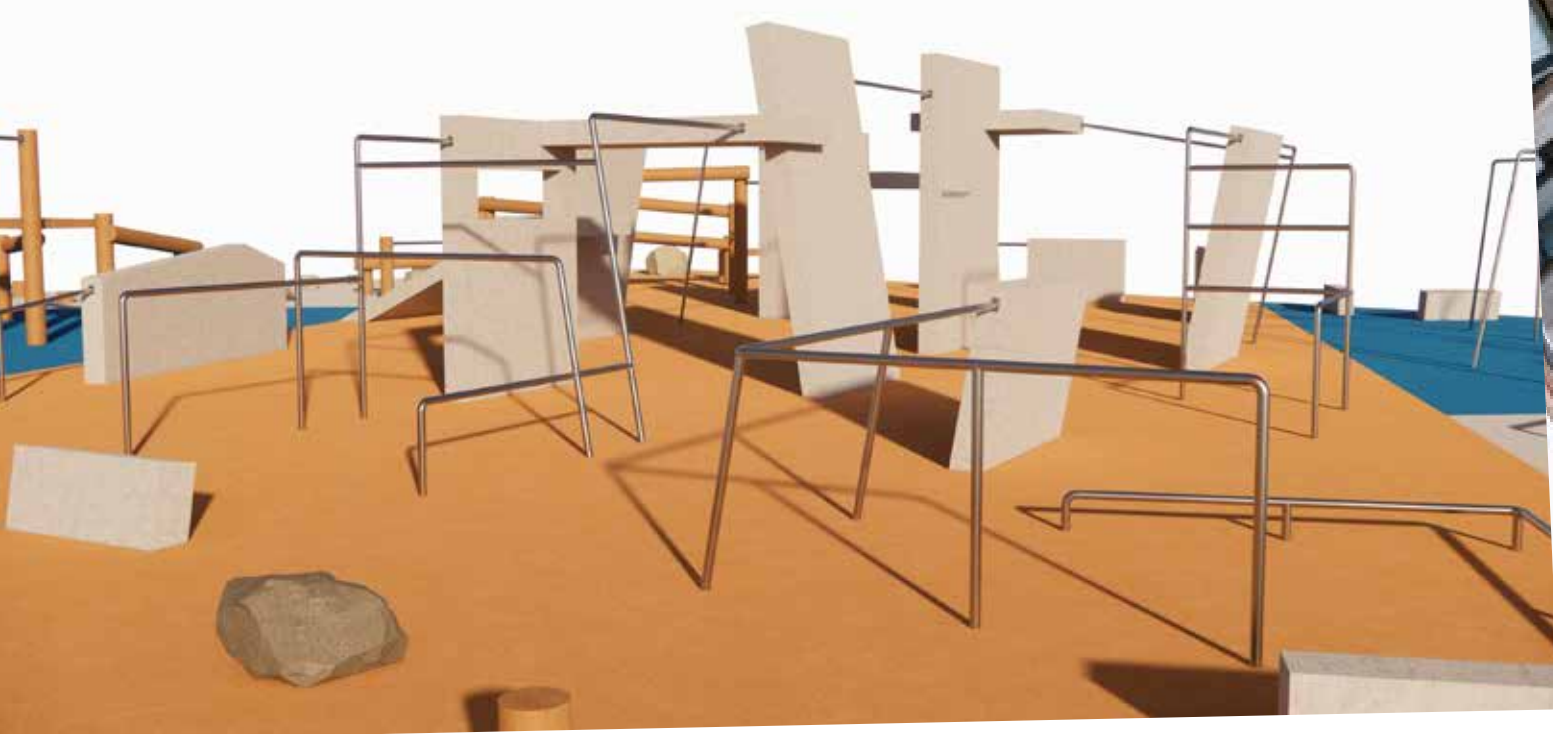

READY-TO-MOVE

Ready-to-move designed by TraceSpace is a real „game changer“ in the world of parkour parks and movement spaces. Modular construction and the use of prefabricated components allow us to make turnkey concepts a reality with the shortest construction time.

Ready-to-move offers a quality and conception that is unique in the industry:

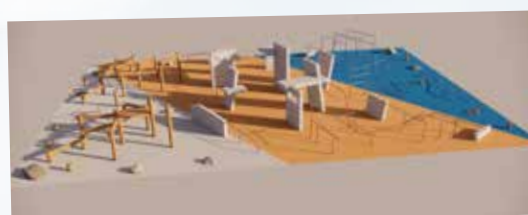

- Aesthetic and functional design
- Planned by German parkour pioneers.
- Ideally coordinated obstacles/equipment/modules
- Multi-perspective design
- attractive for parkour, calisthenics, fitness, fun & games
- Surfaces specially developed for Parkour in concrete & steel
- with outstanding quality
- Individual design options according to customer wishes

OCR

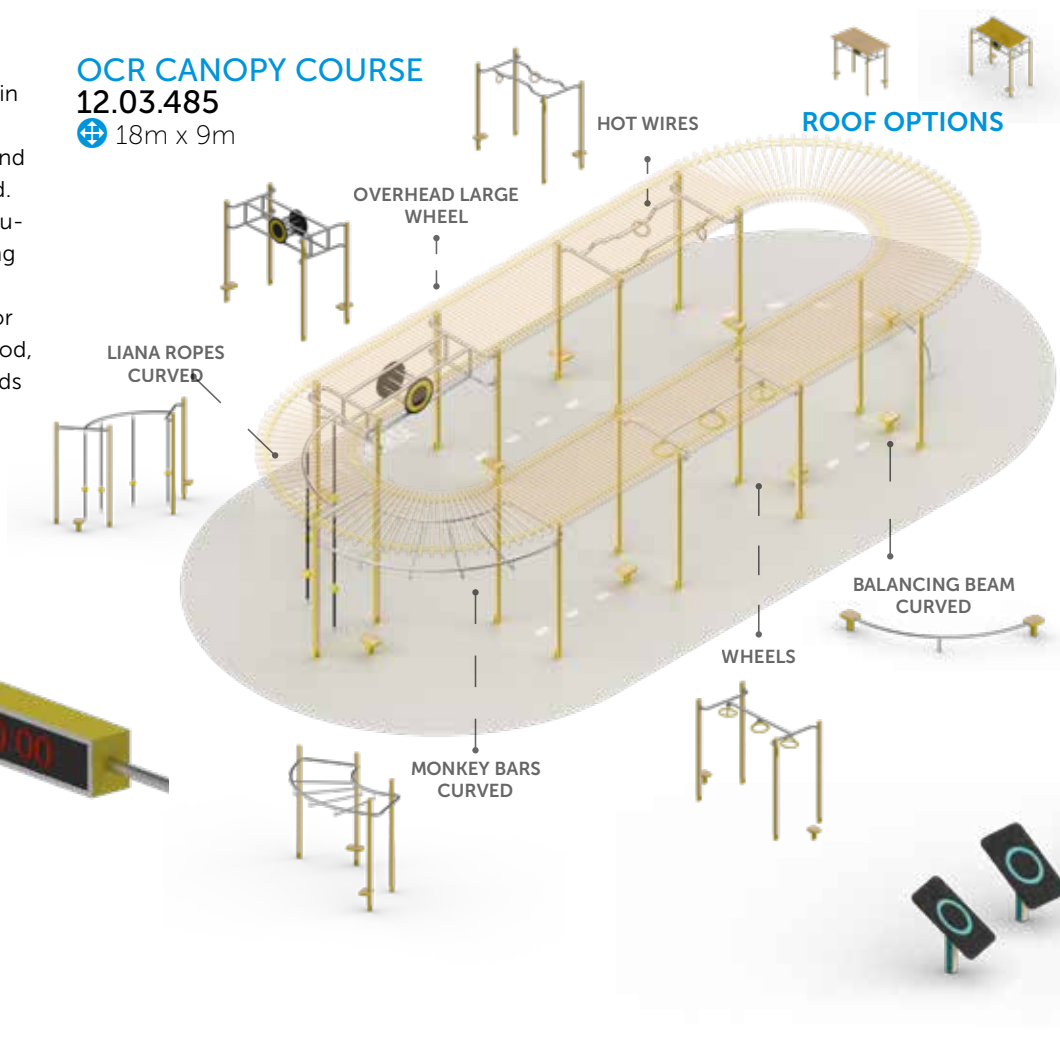

Obstacle course racing (OCR) requires athletes to overcome various obstacles in a short period of time. Strength, endurance, agility, speed, dexterity, balance and coordination are challenged and trained. PLAYPARC offers over 40 different modules for creating a varied course, including digital and analog time measurement and optional roof solutions. With fixed or movable obstacles made of durable wood, steel and net structures, PLAYPARC builds safe, stable and customized OCR parks that are perfectly tailored to the customer's needs and requirements.
