

VINCI PLAY

A wide range of equipment for playgrounds and outdoor activities

lekolar®

Simply Vinci quality

Safety is of the utmost importance to us!

At Vinci Play, we have been taking care of the quality of manufactured playground equipment for almost 20 years, providing millions of children around the world with top-class entertainment and fun.

We subject production processes to detailed control, both in terms of aesthetics and safety of our products.

Our inventive designs stimulate children's unbridled curiosity, whilst encouraging them to play together. Millions of children play every day on Vinci Play playgrounds, built in more than 60 countries around the world.

Operating in the global market, we understand how important it is to consciously manage our social, environmental and organizational impacts. We listen carefully to our stakeholders, constantly look for new solutions and never lose sight of what is most important which is customer values.

Our professional approach makes us a reliable business partner for companies and institutions who are looking for a competent playground manufacturer. We are passionate about helping to create happy communities

Quality under control

Vinci Play playgrounds have been providing children in dozens of countries around the world with lots of fun for years. As a socially responsible company, we put safety of our users first. Thanks to the high quality standards of Vinci Play, playgrounds have a strictly defined structure that protects their users from potential threats. Our products are characterized by gentle edges, a well-thought-out design and no dangerously protruding elements, so that even the most expressive children shall not hurt themselves while using them. We are certain that our many years of experience ensure that the materials and components used, combined with the work of professionals, guarantee the highest quality and failure-free operation of our products for many years.

Advanced production

Thanks to the use of the latest technologies, our equipment is characterized by high workmanship. We make sure that all production processes are modern and efficient, and ensuring perfection is of the utmost priority to our production specialists.

Exceptional design

Elegant colors, natural materials and original graphics prepared by our talented graphic designers are characterized by attention to the smallest detail, ensuring we are able to meet all requests, even the most demanding project.

Highest level of quality

All elements that make up the final Vinci Play product undergo multi-phase and precise quality control to ensure compliance with the EN-PN 1176, EN-PN 16630 or EN-PN 15312+A1 standard. Our quality specialists use a modern laboratory, as well as devices and measuring equipment to assess the quality of materials at every stage of production - from material delivery to shipping the finished product to customers.

Customer Service

Our Customer Service Department operates on the basis of the highest standards of cooperation, confirmed by the ISO 9001:2015 certificate. The department's employees try to respond to inquiries addressed to the company in the shortest possible time and meet the expectations of even the most demanding purchasers. We guarantee cooperation based on understanding the customer's needs and full support at every stage of order execution, both during and after the warranty period.

Highest quality material

At Vinci Play we believe that every detail matters, which is why we use the highest quality materials and components with certificates and approvals to produce our equipment. Thanks to this, the final product is not only aesthetically pleasing and functional, but also safe, durable and compliant with applicable standards.

Quality Guarantee

Quality is the pillar of our company's activity. High standards, according to which we design play equipment, guarantees the best finish. We design playground equipment considering young users' individual needs, ensuring a high-class final product.

FSC CERTIFICATE

A certificate confirming our commitment to sustainable development. This mark informs about the specific origin of the wood, thus certifying that we are a company that takes a responsible approach when obtaining raw materials. Thanks to this, stakeholders are sure that we produce our products from pine and robinia wood by monitoring the supply chain. This means that the customer can trace the origin of the raw materials used to produce a given product, from the forest to the final product.

TÜV CERTIFICATES

We cooperate with certification bodies - TÜV Rheinland and TÜV SÜD, which test our products and issue certificates for their compliance with the relevant standards. These documents are proof that our priority is to care for quality and safety. For Vinci Play devices that do not yet have certificates, we issue declarations of conformity, proving that they meet the requirements of the EN 1176 standard. When choosing our equipment, consumers are sure that they are trustworthy products that maintain high quality and safety standards.

ENVIRONMENTAL MANAGEMENT SYSTEM

ISO 14001 is a standard regarding environmental management. Vinci Play, acting within its framework, takes care of environmental protection and responsible management of production processes. By implementing a specific environmental policy, our company minimizes the negative impact on the environment, being a transparent and socially responsible enterprise.

QUALITY MANAGEMENT SYSTEM

The international standard ISO 9001 defines the management of an organization according to precisely developed criteria. At Vinci Play, the quality management system compliant with the ISO 9001 standard is based on: understanding the customer, leadership, the implementation process and the involvement and improvement of the entire production. By acting in accordance with these principles, contractors are certain of the quality of manufactured products and the clarity of the entire production process.

SAFETY STANDARDS

EN 1176 is a whole spectrum of points and parameters related to playground equipment. The standards in this group define the requirements for the construction of the most harmless equipment possible, paying special attention to high safety standards for the youngest users, while providing them with conditions for development. At Vinci Play, the health and protection of children is of paramount importance for us, which is why we strive to safeguard the quality of our equipment. For products dedicated to young people and adults, such as workout and fitness, the relevant standard is EN 16630. In this case, as for playground equipment, the priority for us is both the functionality of the devices and their safety.

Long-term Warranty

The highest quality of our products is ensured by experienced specialists and high quality materials. That is why we can offer our customers a long-term guarantee of fault-free and fully safe use of our devices. We also provide post-warranty services. Orders for most spare parts are completed within 48 hours.

Selected warranty periods:

Year guarantee

Corrosion resistance of stainless steel and hot-dip galvanized and powder-coated steel elements, resistance to bark beetles and rotting of wooden structural elements.

Year guarantee

Structural strength of HDPE, 100% recycled HDPE and HPL elements; structural elements made of 100% recycled material (composite).

Year guarantee

Durability of steel and stainless steel structures of mobile devices; durability of Robinia wood structural elements.

Year guarantee

Durability of steel and stainless steel structural elements.

Spare parts

The high quality of our products translates into their exceptional durability and, with proper maintenance, long service life significantly exceeding the warranty period. We deliver maintenance instructions to ensure long-term use. However, individual materials naturally wear out or can be sometimes damaged. Therefore, we understand that the availability of spare parts and a quick response to vandalism-related problems is crucial to our customers being able to restore any damaged or worn-out components. We guarantee the availability of spare parts throughout the entire period of use and always provide support and advice on replacing and repairing devices. Orders for most spare parts are fulfilled within 48 hours. Spare parts or their equivalents are also available after the warranty has expired; we ensure their availability for up to 10 years.

What makes us unique

Advanced production processes! From design, through production, to shipping, at every stage our priorities are the highest quality and safety of the playground. In the production process we use only certified materials, and a multi-stage quality control system guarantees that all elements of the products that leave our production line meet strict safety standards. We employ the best specialists who ensure a high standard of production, reliable customer service and professional service of devices. Modern machinery and advanced production organization enables a quick 4-week order fulfillment. We are proud that thanks to the strict standards and quality safety procedures applied in our company, we can guarantee children, their parents or guardians carefree fun and relaxation on the playground.

Welding robots

Welding robots working on a set matrix built specifically for our needs, increase production efficiency thanks to the possibility of conducting welding processes in a continuous manner. The quality of welding joints is at the highest, always repeatable level thanks to the latest CMT technology. All robots work on high-class welding machines.

Laser cutting of steel

The LC5 laser, which is the most modern integrated system for cutting profiles and sheets, allows for obtaining optimal metal processing parameters, allowing for achieving the best results in the shortest time.

Powdercoating

Thanks to the modern powder coating line, our devices are aesthetic and attractive in terms of color. We use the highest quality, child-safe paints with the QUALICOAT certificate. In the powder coating process, we adhere to strict standards for paint curing temperature, coating thickness and paint adhesion to steel elements.

Steel welding

Our products are characterized by the highest quality of welds and precise finishing, which guarantees safe use and durability of playground equipment. A team of highly qualified welders, supported by the most modern welding robots, ensures the highest quality connections of steel elements.

Abrasive processing (shot blasting)

The steel used in Vinci Play devices is cleaned by shot blasting before painting. Thanks to this, we obtain the correct surface and even welds and edges. This ensures better paint adhesion and makes the product even safer, more durable and aesthetic. In professional shot blasting chambers, we process elements of various dimensions, in all weather conditions and at any time of the year. For hot-dip galvanized steel, we use electrocorundum shot blasting, and for black steel, shot blasting with broken steel shot.

Processingropes

For the production of climbing devices and elements, bridges and interlacings, we use 16 mm thick steel ropes in polypropylene or nylon braiding. We connect them using durable fasteners made of plastic, stainless steel or aluminum. Rope elements are dimensioned, cut to the appropriate length and then forged using hydraulic presses with a pressure of 150 tons each.

Galvanizing

We always galvanize black steel components before applying powder coating. Galvanizing effectively protects the metal surface against corrosion caused by atmospheric factors. We use two types of galvanizing: powder and hot-dip galvanizing. We store metal components galvanized using both methods in our warehouses, so we can quickly fulfill the customer's order.

Welding of stainless steel tubes

Vinci Play's qualified employees participate in the entire production process of stainless steel tube slides. They design the tubes, roll them precisely, fit all the elements of the device, and then connect them using durable and safe welds. At Vinci Play, we use high-quality AISI 304 and AISI 316 steel.

Hand made finish

Our experienced carpenters passionately hand-process and finish all wooden elements, and each piece of equipment is prepared individually. This process is complemented by modern 5D machining centers, which guarantees the details are precisely replicated. In this way, we achieve the highest quality of elements, fast implementation and high production efficiency.

Cutting and milling Robinia

A 5-axis machine for cutting and milling black locust wood is an excellent tool for precise production of even the most complex details. The work of the machinery park and robots, supplemented by meticulous manual work on surface grinding, allows us to achieve the best production effects of the Robinia series and a perfectly smooth wood surface.

CNC

We purchase HDPE and HPL boards used for the production of devices from world leading manufacturers which ensures that we use the highest quality products. The boards are processed using CNC milling plotters, guaranteeing precise cutting, milling and punching. The desired shapes and millings, consistent with even the most complex design, have high aesthetic and educational values, and at the same time meet the highest safety standards.

Wood cutting

CNC saws and industrial robots precisely cut and process the timber for the wooden parts of the playground. Beveling the edges of the wood removes sharp edges, and four-sided surface grinding prepares the wood for the impregnation process. The high quality of the wooden elements guarantees the safety of the devices, and the automation of the process allows for short production times and quick order fulfillment.

Wood painting

We use pressure-glued wood in layers to produce wooden devices. The processing of the wooden beams, which involves grinding, impregnation, painting, drying and hardening, takes place on a fully automated production line. The wood undergoes a multi-stage protection process, thanks to which we can guarantee long-term durability of the wooden parts of the devices regardless of weather conditions and climate.

Watch movie.

Materials and components

At Vinci Play, we believe that every detail matters, which is why we use the highest quality materials and components with certificates and approvals to produce our devices, collaborating with world-famous suppliers. Thanks to this we can obtain a final product that will be not only aesthetic and functional, but also safe and compliant with applicable standards.

Wood

Laminated wood with a cross-section of 90 x 90 mm. Top quality first-class wood: without knots, uniform colour, straight grain. Sanded, impregnated and varnished in a multi-stage production process. Secured from above with durable plastic overlays, and from below with hot-dip galvanised steel anchors, which protect the wood from direct contact with the ground, and thus prevent the development of rot and extend its life.

Robinia wood

Robinia - black locust is the most durable wood found in Europe. It is characterised by a light, warm colour. It contains many oils that very well protect the material against weather conditions, naturally preserving, protecting against rotting processes and pests. It is distinguished by its exceptional hardness, resistance to moisture when in contact with soil. When sourcing wood, we make sure that it comes from European forests with the FSC® certificate and other controlled sources.

Stainless steel

A structure made of AISI 304 or 316 stainless steel with an appropriately smooth surface finish is completely resistant to weather conditions, which ensures long service life. It is used to produce playground equipment, slides, tube slides, fasteners and chains.

Steel

- A steel construction of components is made of profiles with different cross-sections. Those steel components are galvanized before applying powder coating, in two options:
- hot-dip galvanizing powder coated with UV-resistant paints with a QUALICOAT certificate,
- powder galvanizing powder coated with UV-resistant paints with a QUALICOAT certificate.

Recycled composite

A structure made of composite, an ecological and innovative material derived 100% from recycled consumer waste, mainly clothing. This material is as durable as steel, does not absorb water, does not corrode or rot. It is also resistant to UV radiation.

HEXA platforms

Platforms and climbing walls made of anti-slip and waterproof HPL board or optionally cross-plywood. They are covered with a phenolic film with a honeycomb imprint surface pressed hot, providing increased resistance to abrasion, mechanical damage and chemicals. They are PEFC certified.

Recycled HDPE

High-quality polyethylene made 100% from recycled waste, including ocean waste such as fishing nets and ropes. Highly durable, environmentally friendly material, resistant to weather conditions: frost, moisture, temperature fluctuations, UV radiation. Used for the production of various types of panels, covers, roofs and other playground components. Available in green.

HDPE

HDPE is a high-density polyethylene, resistant to weather conditions, such as moisture, frost and UV radiation. Three-layer boards with a black filling made of 100% recycled re-granulate are used to produce panels, roofs and other playground components.

HPL

HPL is a duroplastic pressure laminate. Cured polyurethane-acrylic resins create a highly resistant top layer, which makes the boards resistant to chemical and biological factors, UV radiation and changing weather conditions. This laminate is used to produce covers, panels, roofs and other playground components. It has a PEFC certificate.

Polycarbonate with print

Polycarbonate is a very durable material, with a transparency similar to glass, and at the same time twice as light and two hundred times more impact resistant. Additionally, it is resistant to weather conditions, including UV radiation and temperatures in a wide range. We use it to produce panels, covers and 3D spherical windows (portholes). Some elements are covered with a very durable double-sided print, also resistant to weather conditions.

Ropes

16 mm diameter galvanized steel ropes covered with polypropylene or nylon material, connected with plastic, stainless steel or aluminum, resistant to UV radiation, abrasion and rot.

Slides

Slides made of AISI 304 stainless steel, resistant to vandalism and external environment. Also available in fiberglass option. Side covers of the slide made of HDPE or HPL boards resistant to weather conditions, including frost and UV radiation.

Stainless steel slides

Slides made of AISI 304 stainless steel, resistant to vandalism and external factors. Made with attention to every detail, with the highest quality welds, they are an elegant finish for playground products.

Tube slides

Slides made of certified AISI 304 and AISI 316 stainless steel. Sheet thickness: 2.5 mm, diameter of 79 cm, sanded surface. The length of the slide exit depends on the length of the slide itself, the exit cap is made of a pipe with a diameter of 33.7 mm. Available variants: straight, curved or spiral (360 degrees). The tube slides meet the EN 1176 Standard.

PE tube slides

Straight, curved or spiral slides made of colorful, impact- and scratch-resistant polyethylene (PE). The internal diameter is approx. 75 cm. Available in various vivid colors and in different heights.

Moving elements

Moving elements in the Fitness series are based on two solutions: a Swiss joint system - safe and durable, allowing for fully guided movement, resistant to overloads, weather conditions and vandalism, with mechanical stopping and a durable bearing system enclosed in a housing, thanks to which it does not require lubrication and maintenance. These parts ensure long service life of devices with moving elements.

PP tunnels

Double-walled tunnels resistant to distortion, made of PP (diameter 500 or 600 mm). Resistant to wear, vandalism and external factors.

Climbing stones

Colourful climbing stones made of durable composite resin with mineral fillers, resistant to abrasion and UV radiation.

Anchors

In wooden products, we use anchors made of hot-dip galvanized steel, protecting the wood from direct contact with the ground, which prevents the development of rot, thus extending the life of wooden products and ensuring their long-term use.

Chains

Certified chains made of AISI 304 and AISI 316 stainless steel. Calibrated to protect fingers from getting pinched. Safety plugs Rubber or polypropylene safety plugs protect steel profiles from weather conditions and protect children from injuries.

Protective plugs

Rubber or polypropylene protective plugs protect the main construction profiles against weather conditions and children from injuries.

Screws

Screws made of AISI 304 and AISI 316 stainless steel or galvanized and secured with durable polyamide caps, protecting against contact with the external environment. Thanks to this, our devices are resistant to wear and tear or changing weather conditions.

Colours

Different colours of play panels, ropes or construction elements allow our products to fit into various environments. Vinci Play products are aesthetic solutions tailored to the customer's expectations. When choosing colours, we pay special attention to functionality, the visual aspect, and matching the product to users' needs.

Safety first

The playground, fitness and workout equipment manufactured by Vinci Play is characterized by a refined style, attention to detail and design in accordance to European safety standards. We subject all products to multi-stage verification with particular care before making them available, thanks to which we are sure that they are perfect, both visually and in the context of safety.

Versatile playgrounds for everyone

Our equipment is characterized by high versatility, thanks to which it is adapted to various needs - the size of the playground, the age of the target group, budget or color guidelines. Our mission is to bring smiles to all users, including those with special needs. Thanks to integration playgrounds, everyone can experience the joy of play.

Beneficial effect on children

Before designing new equipment, we conduct an in-depth analysis of children's needs, thanks to which playing on our equipment provides children with a lot of positive stimuli. Graphics that arouse joy in children stimulate friendly emotions, eliminating fears and stress, which contributes to building a sense of security and inner peace. The cheerful illustrations created by our artists support the proper development of children's psyche, directly affecting the central nervous system. While playing on the playground, the youngest users gain their first experiences in forming relationships with others, learn to share, wait patiently, deal with emotions and cooperate in a group setting.

Development of imagination

Unique structures and effective design take children to the land of smiles, providing them with an unprecedented range of emotions. Themed designs referring to ships, castles or other interesting places encourage creative play and active spending of time outdoors. All this helps in the development of a child's imagination and social integration.

More and more ideas

We constantly follow the latest trends on the market and analyze the needs of children around the world. Thanks to this, we provide our customers with increasingly innovative solutions, while maintaining the highest quality. Vinci Play is a company of the future, where quality, safety and style combine into one to produce industry leading playgrounds.

Sustainability at Vinci Play

At Vinci Play, we have been ensuring stable and sustainable growth for many years. Operating on a global market, we understand how important it is to be aware when managing our social, environmental and organizational influences. We listen carefully to the opinions of our stakeholders, we look for new solutions every day and never lose sight of what is most important, such as values in business.

Sustainable development is one of the key foundations supporting Vinci Play's business growth strategy. We persist in efforts to ensure that our operational activities support the implementation of the UN Sustainable Development Goals. Our intention is to implement the assumptions of the ESG strategy by 2026, which includes 73 tasks that maximize our positive impact in the value chain. We reflect the global partnership for sustainable development in three pillars of responsibility: towards people, the planet and the community. Each of them pursues specific goals that provide an answer to the expectations of our stakeholders: employees, customers, social and business partners.

We continuously invest in social potential, responsible resource management, and product safety and quality. We develop our portfolio in the spirit of a circular economy, we focus on the development of renewable energy sources and ecological education. We want our products to support the development of social bonds in every corner of the world. We believe in the power of collective partnership, which is why we are an active signatory to real changes in the world, guided by the maxim of "conscious participation in positive transformation for the good of future generations".

For Society

Vinci Play supports social connections and involvement. We intend to develop related projects with ecological education and supporting intergenerational integration and the development of social bonds in the places where we operate. The goals we set for ourselves in this regard include: improving the ESG management structure, raising standards ethics and respect for the rights of stakeholders.

For the Planet

We will intensify actions to mitigate the effects of climate change. We are planning the transformation of our offices and production plants.

We will innovate in terms of designing and expanding the product portfolio focusing on a circular and low emission economy, as well as responsible use of natural resources. The goals we set for ourselves in this plan are, to name a few, measuring carbon footprint emissions, investing in renewable energy, increasing recycling and upcycling of waste.

For the People

Vinci Play aims to increase its efforts to support development of the company's employee potential. The company intends to implement numerous projects in the field of employee safety and health and diversity management. The goals we set for ourselves in this policy, among others, are: an increase in satisfaction of our employees and establishing partnership cooperation throughout value chain.

The idea of ecological playgrounds

A playground is a place where children can play, develop and learn. Ecological playgrounds use natural materials and sustainable solutions to create a safe and pleasant place for children to play, while taking care of the natural environment.

Green playgrounds are not only a place to play, but also an important element of education and building ecological awareness among children. They are also an example of a responsible approach to the design and construction of public spaces, with respect for the natural environment and the well-being of future generations.

Why it is worth creating ecological playgrounds:

Reducing CO2 emissions

The wood we use to produce playgrounds is a more ecological raw material than steel, aluminium or plastic. Using wood in production reduces the climate footprint.

Promoting sustainable development

Children playing on Vinci Play playgrounds learn about environmental protection and responsible use of natural resources.

Improving health and well-being

Contact with nature has a positive effect on children's health and well-being. Through ecological playgrounds, we encourage physical activity and spending time outdoors.

Creating a pleasant place to play

We design playgrounds with aesthetics and functionality in mind, creating a friendly and encouraging environment for play.

Reducing the impact on the environment

In the production process of ecological playgrounds, we use materials from recycled or renewable sources.

Waste minimization

The materials from which we create playgrounds allow them to be reused after use.

Our solutions

Recycled textile composite

Out of concern for the future of children and subsequent generations, the idea was born to replace our classic elements of playground equipment construction with materials from post-consumer recycling. As a result, we created the Recycled series. Composite posts are made entirely of recycled clothing, and at the same time they are durable and aesthetic.

Ocean Waste

Recycled HDPE used in the Recycled product series is based on secondary raw materials. High-quality polyethylene is made from recycled ocean waste. Fishing nets and ropes extracted from the water, properly processed, are a highly durable, environmentally friendly material, resistant to weather conditions: frost, moisture, temperature fluctuations and UV radiation. Used to produce various types of panels, side panels, roofs and other playground components.

Robinia wood

Robinia series is manufactured from natural black locust wood obtained from European plantations. Acacia wood used to produce Robinia series devices contains many oils that protect the material very well against weather conditions, naturally preserving it, protecting it from rotting processes and pests. Our black locust wood comes from European plantations with the FSC® certificate and other controlled sources, thanks to which we care for the future in the spirit of sustainable development.

Play is ECO!

A playground is a place where children spend time in carefree play, developing their imagination and improving their motor skills. We make every effort to ensure that these spaces are not only safe and attractive, but also environmentally friendly. Ecological playgrounds are not just devices, but the entire ideology of the company, which takes care of sustainable solutions in the production process. Thanks to the increasing social awareness of eco-responsibility, we have access to many sources that help us create 'green' devices. In 2022, Vinci Play introduced a special "Recycled" series, which uses materials originating in the majority of percentage from consumer waste.

Recycled plastic

We have replaced ordinary plastic with raw material made from used ropes and fishing nets. By using "green plastic", we reduce the amount of plastic waste on land and in the oceans.

Textile waste

Our durable posts are made of used textiles and foil. Recycling clothes and bags is key to reducing carbon dioxide emissions and reducing waste in landfills.

Wood

Our wood comes from controlled farms that care for biodiversity and ecological balance. Sustainable forest management prevents unfavorable climate changes.

Environmental protection

Caring for the natural environment is an important aspect of our business activities. FSC® certificate number RINA-COC-000904: (FSC® license number C163573) confirms the use of materials from properly managed FSC-certified forests and other controlled sources. In all our activities, we are guided by the principles of sustainable development, including the selection of contractors and suppliers. We have an ISO 14001:2015 certificate, which confirms the implementation of an environmental management system.

Our solutions

Stainless steel

Stainless steel is a durable and corrosion-resistant material, thanks to which devices manufactured with it have a long service life, which reduces the need to replace them, and therefore reduces the amount of waste. It is also fully recyclable, after use it can be melted down and reused to produce new products. The stainless steel recycling process is effective and the material does not lose its properties, which makes it a virtually endless cycle.

Recycled tyre edges

Trampoline edges made from recycled rubber tyres are designed to protect its users from injuries. The SBR rubber edging glued to the structural frame of the trampolines protects the edges.

Minimizing wastes

In the process of producing devices from robinia wood, we try to minimize the waste generated - we select all the poles and try to use the simplest elements in the highest structures of tower devices. We use the remaining pieces in other, smaller devices, including for the production of rockers or small architecture.

Parts replacement

The possibility of replacing parts in devices and their availability means that the amount of waste is decreasing globally. A damaged or partially used device, instead of ending up in a landfill, remains in use after repair. The production of a new device is energy-intensive, replacing only parts promotes sustainable development through more efficient use of resources. We support the circular economy model, where products are repaired and refurbished for further use.

Design under control

Designers and engineers creating playground equipment, with attention to detail, refine each play element so that it meets the individual needs of users. Thanks to personalization, we implement projects tailored to the unique preferences of customers. Each series of products is characterized by a different style and various features of appearance and functionality, which means that our customers can choose from a wide range of items that will perfectly fit into the existing playground environment.

Graphic artists (customized graphic design)

Many elements of Vinci Play devices are made of polycarbonate with creative graphics made by our talented artists. The diverse styles of our illustrators allow you to give an individual character to each device from the offer. The uniqueness of our designs is confirmed by the involvement of our creators in the production processes, creating various play environments with individual styles.

Diverse designs

We create all Vinci Play playground equipment based on safety standards, while ensuring the highest quality design. When designing new play equipment, we make sure that its appearance is attractive and unique, modern and stylish, and at the same time safe and reliable.

Design your playground

Design a functional and safe playground with the 3D planner application. Thanks to this user-friendly app you will be able to create several versions of the playground and choose the one you like the best in just 5 minutes. Upload a photo of the space you have at your disposal and fill it up with Vinci Play equipment. See what your new playground will look like in the morning, in the evening and during different seasons of the year. You will be able to export the created visualizations to .jpg/.png or .pdf files. Our 3D application will calculate the area needed for the installation of the Vinci Play equipment based on their safety zones, so that your modern playground can meet all the requirements of the EN 1176 standard.

1. How to start?

You can easily name the project, define the size of the area and the shape and size of the playground.

2. Choosing Vinci Play products

You can search for a Vinci Play product by the age of users, product series, materials or colour versions through a quick and intuitive search engine. The application contains an up-to-date library of all devices available in the offer.

3. Adding products, plants and creating a playground of your dreams

Adding equipment or plants is child's play. As soon as you make your choice - just click on the product (or on a plant) and drag it to the selected area. When putting more products, special attention should be paid to ensure that the safety zones of individual elements do not overlap (this is very important!) - when this happens, the contact area will be highlighted in red.

4. Defining surface texture

Each playground also has a surface. Not all devices can be installed on grass or sand. You can easily sketch various shapes on the surface that can be made of flexible poured surfaces. Just choose a defined shape - circle, square or hexagon, or draw an irregular shape by hand. It is very easy! Then you can choose the colour or texture of each element of the surface.

5. Displaying a 3D view and printing

All steps so far have taken place in top view. It's cool, but the visualization of the playground is something that interests us much more. How to show a 3D view? It's also very easy. Just click one button and the playground we have created will show up in all its glory! The view can be zoomed in and out, shown from different angles, thanks to which we will feel as if we are walking on an already existing playground. We can also quickly print a specific view and leave it with the customer together with the offer.

Development through play

Play is the key to a child's happy and healthy development, it is a natural need of every toddler, and at the same time it is an excellent tool for learning and exploring the world.

The numerous benefits of playing, such as: physical, cognitive, social and emotional development, prove that it is a key element of human development. It is an important factor in the process of shaping motor skills in children. Parents can support the development of their children's motor coordination by providing them with access to places dedicated to them. The ideal area that guarantees these conditions is a playground, which stimulates them from an early age. Playing also has a significant role in building social and emotional skills in children, such as establishing relationships with peers, resolving conflicts, expressing emotions or dealing with difficulties. The entertainment provided by the playground stimulates cognitive development, including logical thinking, imagination and creativity.

Social development

Social skills are: the ability to communicate, cooperate, and function in social life.

Psychomotor development

The entire spectrum of movement and reasoning skills can be called psychomotor skills.

Emotional development

Emotions are: fundamental psychological experiences that influence thoughts, behaviours, and interactions with others.

Cognitive development

The key skills in human life are: thinking, understanding, and processing information from the environment.

Motor development

Fine motor skills are precise movements, while gross motor skills define general movements performed by larger muscle groups.

Our solutions

Integrating equipment

Playing together and interacting with peers allows children to develop socially. Through cooperation and sharing, they acquire social competences. Thanks to the ability to find their place in a group, they gain self-awareness and learn how social interactions work. Inclusive playgrounds provide a safe space for children with various disabilities to play.

Educational elements

Products focused on the education and development of toddlers. They help to increase children's awareness, developing mathematical skills and logical thinking. Manipulative elements allows children to develop their motor skills.

Obstacles and balances

Equipment elements that engage many muscle groups and help strengthen them. They require maintaining balance, which helps develop balancing skills and body stability.

Thematic products

Imagination and one's own internal development are the basis of human personality. Products that enable self-expression and the creation of imaginative play scenarios have a positive impact on the development of the creative side of children's minds.

Play for all

Inclusiveness is about creating an environment where everyone is welcome and respected. This means removing barriers and providing everyone with equal opportunities to participate in different aspects of social life. Integration makes everyone feel accepted and valued, which strengthens social bonds. Playgrounds play a key role in children's development, offering them a space to play, learn and integrate. These unique places are not only a source of entertainment, but also stimulate children's all-round development, helping to build their self-confidence.

Our solutions

Wheelchair ramps

Wheelchair ramps are designed to allow people with disabilities to use the device in an active way, exploring places previously inaccessible.

Educational elements

They are places of rest from physical activity, playing with them stimulates brain development. Thanks to their location, they are easily accessible for people with disabilities.

Inclusive carousels

We offer various types of inclusive product, including carousels. Both spinning wheels and traditional rotating carousels enable everyone to play, including wheelchair users.

Stairs with a special platform

Stairs with handles for the disabled have been designed to make it easier for people with limited mobility to get to the device.

Moving panels

They support development and arouse children's curiosity, encouraging them to play. The panels also act as a cover for the devices, thanks to which most of them are easily accessible.

Trampoline for wheelchairs

This model of trampoline has been designed to make it possible for a wheelchair to enter it and for people who are able bodied to use it also.

Logic games

Thanks to the location of the logic game elements at the bottom of the products, the youngest children and those with limited mobility can easily use them.

Rest areas

Swings, hammocks and horizontal climbing nets have been designed in a way that makes it easier for people with disabilities to use them, while supporting their integration with other users of the playground.

**Be more eco
with Vinci Play!**

Recycled, a better way!

Caring for the future of children and future generations, the idea was born to replace our classic elements of play equipment construction with post-consumer recycled materials. As a result, we have created a group of Recycled products based in 100% on recyclable materials that lower carbon emission.

Towers, slides, ladders, sandboxes, educational panels, spring rockers, swings and complementary elements, such as benches and litter bins - all produced with the use of recyclable materials.

**LOW CO₂
EMISSION**

**SEE RECYCLED
CATALOGUE!**

Composite posts

Recycled posts made of an innovative material made of used clothing and foil. The characteristics include, among others that this material: does not corrode, is durable as steel, resistant to algae formation, does not absorb water and is resistant to UV radiation.

Recycled HDPE panels

Roofs, side panels and moving elements manufactured from ocean waste – fishing ropes and nets. With high durability and resistance to weather conditions these panels allow to create a playground with almost 100% recycled elements, contributing to a healthier environment for future generations.

Plywood platforms

Anti-slip and waterproof platforms and climbing walls made of plywood coated with a hot-pressed phenolic film with a honeycomb surface imprint – it offers increased resistance to abrasion, mechanical damage and chemical agents. It is PEFC-certified.

HDPE with recycled core

A high-quality material resistant to atmospheric agents, i.e. it is waterproof, resistant to frost, UV radiation or moisture. We use three-layer plates (a black core is made of 100% recycled granulate) for the production of various panels, roofs and other playground components.

Stainless steel bars

AISI304 or AISI316 stainless steel bars are used as handrails, fireman's poles, climbing frames, ladders. With a smooth surface, it is completely weather-resistant, thus ensuring its long life span.

HPL elements

HPL panels are being used as supplement in various types of equipment, harmonising with recycled style of the series. This laminate is resistant to chemical and biological factors and weather conditions.

wooden recycled

Wooden now in Recycled option!

The WOODEN series now available in a new material version. Instead of painted wood construction, products are available in the Recycled option.

Various educational and sensory panels combined with moving elements will bring children a lot of joy and arouse great interest.

The environmentally friendly Recycled series devices stimulate the child's comprehensive physical development and also allow a large group of children to play together. Thanks to this, the child learns to establish relationships with peers and cooperate in a group.

solo • recycled

Fun for the youngest!

The SOLO series is a paradise for preschoolers, ruled by sand, water, sound and movement.

Free fun develops natural creativity, encourages experimentation and unleashes imagination and the desire to cooperate with other children.

Numerous manual and sound elements and educational panels stimulate the senses in a comprehensive way, stimulating the child's intellectual development.

climbo recycled

Climb, crawl and pull-up

The CLIMBOO series develops the skills and coordination of older children, increasing their self-confidence.

Various ladders and climbing walls of varying degrees of difficulty strengthen muscles and teach the child to concentrate and maintain balance.

This series is an ideal place to organize games with elements of competition, where exciting physical challenges are accompanied by maximum safety.

spring recycled

Rocking and swaying

The SPRING series is pure energy on springs. It satisfies a child's natural need for free and carefree swinging.

Various vehicles and cheerful animals on springs encourage toddlers to energetically jump and swing in rhythm with body movements.

Spring riders and rockers, loved by children, allow for joyful play, which also brings huge benefits for their psychomotor development.

hoop recycled

Spin, spin!

The HOOP series consists of carousels and spinners that power the world of laughing children.

Spinning is an important activity in a child's development - it helps the nervous system mature, stimulates the sense of balance, strengthens the muscles and skeletal system.

Small park architecture

The PARK series is an essential addition to a child-friendly playground.

Comfortable benches and tables, waste bins, information boards and fences provide comfortable rest for children and their parents and guardians.

The modern and aesthetic design of small architecture harmoniously matches the playground equipment.

Vinci Play!**

Robinia, naturally!

The ROBINIA series is an inexhaustible source of inspiration for play for younger and older children. The variety of educational and sensory panels, as well as moving elements, stimulate in children great interest and joy.

The environmentally friendly, wooden devices in the ROBINIA series stimulate the comprehensive physical development of a child and allow a large group of children to play at the same time. Thanks to this, the child learns to establish relationships with peers, and cooperate in a group.

Over 150 playground-equipment, sports, and small architecture products fit perfectly into both the natural landscape and modern architecture.

SEE ROBINIA
CATALOGUE!

Robinia wood

The acacia wood used in the production of the Robinia series contains many oils which protect the material very well against weather conditions, naturally preserving it against rotting processes and pests. By obtaining wood, we are sure that it comes from European plantations with FSC® certification and other controlled sources, thanks to which we care for the future in the spirit of sustainable development.

Safety standards

In order to maintain the unique and irregular nature of the acacia wood, each product is individually prepared in accordance with the safety standards. In the Robinia series, we have developed unique technical solutions ensuring compliance with the EN 1176 safety standard. The products are certified by the international certifying institution TÜV SÜD and TÜV Rheinland. In addition, our production plants undergo periodic control audits by independent certification bodies.

Safe finish

Thanks to the processing of wood by sanding, we smooth its surface, erasing any rough edges or unevenness, so we make the product not only aesthetic but also safe.

Polycarbonate

Our devices are enriched with components made of transparent polycarbonate, which is an excellent alternative to glass. Twice lighter and at the same time two hundred times more resistant to impacts, this material is perfect as a functional and aesthetic detail in devices for playgrounds. Additionally, it is resistant to UV rays, weather conditions and temperatures in a wide range.

Stainless steel

Gutters, troughs and bathtubs made of AISI 304 or AISI 316 stainless steel with a suitably smooth surface finish allow children to play in water and sand. With proper maintenance, stainless steel remains unaffected by weather conditions, which ensures its long service life.

Surface anchoring in Robinia

For most Robinia equipment, anchoring to concrete (K3 surface anchoring) is available, where Robinia logs are put on hot-dip galvanized anchors. A solid solution allows the installation of products of this series in various environments, adapting to various projects.

Quick and easy installation

Before shipment, all products undergo preliminary assembly in our factory to prevent jams. We have developed a special connection system, consisting of appropriate undercutting, specialised fastening, and machining holes in key places. Thanks to the clear instructions and the individual marking of the components, it is possible to install quickly and easily, without specialist knowledge and tools.

Packing and transportation

All elements are manufactured in such a way, that it is possible to transport both by road (by bus, or semi-trailer), or by sea or air. The appropriate packing of the elements optimises space and transport costs, and facilitates convenient unloading without the need for cranes or specialist equipment.

Robinia

Destination: nature!

The ROBINIA series consists of playground equipment made of natural raw material - Robinia acacia wood, the most durable wood found in Europe. This timber is characterized by natural, bright colours, has high weather resistance, does not require impregnation and can be anchored directly in the ground.

The unique Robinia series has been designed in a comprehensive way to enable creating of an offer containing all types of playground equipment: from tower sets with many climbing elements, through spring riders, carousels and swings, to small architecture.

Characteristics of the ROBINIA series:

- 

Robinia wood construction
- 

Stainless steel elements
- 

HPL panels
- 

Stainless steel slides
- 

Ropes with steel core
- 

Polycarbonate (PC) panels
- 

Durable connectors

**Get higher with
Vinci Play!**

Let's play in the sky!

Tall conical and cubic towers reaching to the sky are a paradise for children. Made of the highest quality materials, with a beautiful design, enriched with educational elements and musical panels, as well as stainless steel tube slides. Thanks to the modular system, they can be the whole playground themselves or be its main advantage.

Construction

Steel construction of high modular tower equipment is made of sturdy profiles hot-dip galvanized and powder coated with UV-resistant paints holding the QUALICOAT certificate available in a great variety of colours. Our products are aesthetically pleasing and prepared with great care to obtain highest quality design requirements.

Modular system

High tower sets can consist of many different configurations. They are available with different height options, can be made of single elements, or connected by steel passages or bridges. This makes them flexible to fit any project.

Educational panels

Various educational elements made of the highest quality HPL panels make the playground more attractive, creating an interesting place not only for teenagers but also for younger children.

Design by Vinci Play

Side walls of tower sets can be made of very durable material, resistant to weather conditions, including UV rays and a wide range of temperatures. Covered with cheerful graphics created from scratch by a team of creative graphic artists, it allows to customize the appearance of any playground.

Openwork steel passages

Passages made of thick stainless wire create openwork spiral passages connecting individual parts of equipment. This makes the structure look lighter and allows children to play with a bit of a thrill.

Musical panels

To make it even more fun our products can be boosted by musical elements made of the highest quality stainless steel and colorful talking tubes.

Activity elements

Inside the cubes and cones, there are many activity ladders, nets, and bridges, made of galvanized steel ropes in polypropylene braid, linked with durable fasteners. The rope elements are processed using hydraulic presses with a pressure of 150 tons. These rope nets are a real challenge for children, thus supporting their psycho-motor development.

Stainless steel tube slides

Slides made of certified AISI 304 and AISI 316 stainless steel with 790mm diameter, sanded surface. Available variants: straight, curved or spiral depending on the design. The entire production process of stainless-steel tube slides is performed by highly-qualified Vinci Play employees. They design the tubes, then roll them with high precision, match all the elements of the device, and finally, connect the components using durable and secure welds.

maxx

Higher, higher, higher!

The MAXX series are amazing towers that impress with their size and encourage physical activity.

These products reach up to 9 meters in height, creating some of the most impressive play structures.

The devices enable integration with other children during social play. Climbing on them is an amazing adventure, and the twisted tube slides additionally diversify the fun.

jungle

Wild adventure!

The JUNGLE series will allow you to climb to the heights and conquer the unconquered. High, up to 9,5 meters above the ground, the greatest adventures will take place like in the crown of trees! Among green leaves, branches and colourful cheerful graphics, everyone will be able to turn into a traveler and explorer. High tube slides are really fun - not only for small kids, and the climbing elements are a challenge and encouragement to be active.

steel+

Simple fun!

The STEEL+ series comprises modern tower structures with many features that will delight both younger and older children.

Colourful towers enriched with musical elements are just the perfect place to have some fun with fellow companions and are also a great spot for relaxation.

A vast variety of devices with educational elements facilitate the integration of children of different fitness levels.

topicco

Play a role!

A series of role-playing devices: a train station, a fire station, a fire truck, a lighthouse, a ship, a truck or a roller. These devices release a child's natural tendency to play happily and learn the "adult world" as well as engage in teamwork training.

The TOPICCO series offers a number of elements such as educational panels or manual elements that stimulate motor skills and positively affect the intellectual development of young children.

wooden

Equipment from painted wood

The WOODEN series is an endless source of inspiration for both younger and older children how to have fun.

Various educational and sensory panels, coupled with moving elements, will bring children lots of joy and draw a lot of interest.

The environmentally friendly wooden equipment from this series stimulates the child's comprehensive physical development and also allows a large group of kids to play together at the same time. Thanks to this, child learns how to establish relationships with their fellows and how to work as part of a team.

Characteristics of the WOODEN series:

Wood construction

Galvanised anchors

HPL HEXA platforms

HDPE panels

Polycarbonate (PC) panels

Stainless steel elements

Stainless steel slides

Durable connectors

Ropes with steel core

Protective tops

PP tunnels

PE tube slides

Colour & material options*:

Colour (panels):

C1 HPL - RAL6000

C2 HPL - RAL3000

C11E HDPE - multicolour

C3 HPL - RAL5024

C9 HPL - wood pattern

Platforms:

HEXA HPL

HEXA plywood

Slides:

Stainless steel

Fiberglass

Anchoring:

Surface

Deep

*Material options apply to selected products, for more information visit: www.vinci-play.com

solo

New!

Fun for youngsters!

The SOLO series is a paradise for preschoolers, which is ruled by sand, water, sound and movement. Free fun develops natural creativity of the child, encourages to do experiments and triggers the desire to cooperate with other children. The richness of colours, manual and sound elements, along with educational panels: all these elements comprehensively stimulate the senses and the intellectual development of child.

minisweet

Colourful series for the youngest

The MINISWEET series consists of playground equipment designed for the youngest children and preschoolers.

Friendly houses, tunnels and slides are an ideal place to have fun together. This is also where the child learns the principles of functioning in a group while perfecting its language skills.

Minisweet devices encourage children to exercise and support the development of key mobility aptitudes. They allow every toddler to enjoy joyful and carefree fun.

steel!

Classic tower sets

The STEEL series consists of classic structures that offer unlimited fun for older children. The sets of equipment from this series can be perfectly adapted to the needs of children and the available space.

Rows of towers connected by various attractive movable elements make for a great training ground for motor coordination. They allow a large group of children to play together at the same time, which helps to establish relationships and also teaches teamwork as well as healthy competition.

Unique houses

The CROOC series is all about beautiful, unique designs, vibrant colours and multi-tower playground sets that allow large group to have fun together.

Fairytale houses encourage children to engage in role-playing activities with their fellows. Element merging platforms, ladders, climbing walls and slides of different difficulty levels comprehensively stimulate the proper motor development of each child.

This series guarantees that the child’s energy is channeled effectively.

climbo

Climb, crawl and pull-up

The CLIMBOO series comprises equipment that develops the fitness and coordination of older children, increasing their faith in their own abilities.

Various climbing ladders and walls with a varying level of difficulty strengthen the muscles and teach the child to concentrate and maintain balance.

This series is the perfect place to organise competitive games where exciting physical challenges are coupled with maximum safety.

Ropes, ladders and spinners

The NETTIX series comprises modern equipment in the form of ladders and rope crossings, which constitute a combination of carefree fun and effective fitness training.

Rope climbing stimulates the sense of balance, strengthens the muscles and improves the child's dexterity. It also encourages children to compete with each other.

This series is a creative adventure among ropes, where the boundaries are set only by the children's imagination.

spring

Rocking and swaying

The SPRING series equals pure energy on springs. It satisfies the child's natural need for unrestrained and carefree swinging.

Colourful vehicles and happy animals encourage kids to jump energetically and sway in the rhythm of body movements.

The spring riders, which are so beloved by children, allow for joyful fun which also carries great benefits for kids' development.

swing

New!

Swinging in full swing!

The SWING series includes classic equipment beloved by younger and older children.

Colourful single swings, see-saw swings, multi-swings with bird's nest seats and weight-balanced multi-swings offer a pleasant thrill for children and encourage them to play with their friends.

Rhythmic swing movement is an effective body balancing exercise that has a positive effect on the development of the muscular and nervous system.

hoop

New!

Spin, spin!

The HOOP series consists of roundabouts and spinners which drive the world of laughing children.

Spinning is an important activity for the child's development as it promotes the maturation of the nervous system, stimulates the sense of balance, strengthens the muscles and the skeletal system. At the same time it is a source of exciting sensations. For an older child, it is often a favourite place of crazy fun with friends.

Colourful carousels encourage both younger and older children to have fun together.

Characteristics of the HOOP series:

- Stainless steel construction or elements
- Galvanised steel construction or elements
- HPL platforms
- HPL panels
- HDPE panels
- Spinning elements
- Movable elements

Colour & material options*:

- Colour (panels & construction parts):

● C5 HPL - multicolour

● C3 HPL RAL5015

● C8 HPL NCS-S 1060-G60Y

● C6 HPL RAL1017

● CASTILLO

● JUNGLE

● SPACE

● C12 HPL RAL7038
- Construction:

● Painted steel

● Stainless steel
- Anchoring:

- Surface

- Deep

*Material options apply to selected products, for more information visit: www.vinci-play.com

Be like Lewy!

The ARENA is a multifunctional playing field that can be an independent sports facility, perfectly suited for public spaces. In the Arena you can play football, basketball, handball, hockey, tennis and many more.

The highest quality construction and materials are resistant to the loads associated with the use of the field. Thanks to the modularity of the size and functional design, as well as the possibility to choose the material and colour version, the Arena can be adapted to individual needs.

**MODULAR
SYSTEM**

1. Determine the size of the Arena

Using modular side panels, an Arena of any size can be created.

The corners, depending on the needs, can have a right angle or be cut (set at an angle).

2. Choose the design and material options

The structure of the Arena can be secured with a durable hot-dip galvanized coating, or galvanized and additionally secured with a three-layer paint.

Steel modular panels from which we create the Arena come in three options:

- vertical steel tubular profiles permanently welded to the frame, creating a durable, stable structure;
- walls made of HDPE board, resistant to weather conditions, reinforced with steel profiles;
- vertical rails made of recycled composite, resistant to moisture and low temperatures.

3. Set the height

Thanks to the modular panels, the height of the side walls can be freely adjusted to individual needs. Each panel is 1 m high. The durable safety net is available in the height of 2 or 3 m.

There are five combinations to choose from:

- one row of panels;
- two rows of panels;
- three rows of panels;
- two rows of panels + 3 m safety net;
- three rows of panels + 2 m safety net.

4. Select the entrance type

The type of entrance to the Arena can be adjusted to suit any needs. Five types are available:

a panel with an opening, an openable wicket with or without additional blockade against the entry of bicycles, an offset panel or a lockable technical entrance.

**MODULAR
SYSTEM**

7. Choice of complementary elements:

Additional elements of Arena equipment are designed so that they can be placed anywhere in the walls of the playing field. Four elements to choose from:

- stand-up bench;
- a small "Brazilian" gate;
- free-standing basketball basket;
- volleyball net.

5. Select football goals

- Football goals come in four configurations:
- without top panel;
 - with top panel;
 - with top panel and the basketball basket on the front;
 - with top panel and two basketball baskets: front and rear.

6. Pick side elements in the goals

- The side walls of the goals come in three variants:
- open;
 - with a crossbar to prevent the bicycle from entering the field;
 - completely closed (full goal).

Jump to the sky!

Jumping on the trampolines is a great fun, but also a great training! It allows you to strengthen your muscles, improve fitness and coordination, and at the same time reduce stress and tension, allowing you to relax.

Our trampolines are available in various colours and thanks to the special structure of the elements, any combination of shapes.

Characteristics of the FITNESS series:

Galvanised steel construction

Stainless steel construction or elements

Robinia wood construction

HPL HEXA platforms

HPL elements

Polycarbonate (PC) panels

Durable connectors

Protective tops

Movable elements

Colour & material options*:

Colour (construction in steel):

C8 - NCS-S-1060-G-60Y

C17 - RAL4008

Ci - stainless steel

C12 - RAL7040

C3 - RAL5015

C16 - RAL6013

C18 - NCS-S 2040-B10G

Construction:

Painted steel

Stainless steel

Robinia wood

Anchoring:

- Surface

- Deep

workout pro

New series!

Effective and professional training

The WORKOUT PRO series is advanced equipment designed to create professional training environments, ideal for competitive and professional athletes.

Each device is designed to provide the tools for effective and intensive exercises.

The structures included in the series are characterized by solidity, durability and austere design, which increases functionality and comfort of use.

Let's create a dog zone!

The WOOF series are devices for dogs, allowing them to develop and facilitate socialization with other furry friends.

These devices are ideal for starting agility training with your pet. Activity on devices from the WOOF series engages the dog both physically and mentally, contributing to improving its agility and coordination. Our products for dogs significantly affect their quality of life, while enriching urban infrastructure.

Small park architecture

The PARK series is a necessary complement to a kid-friendly playground.

Comfortable benches and tables, colourful litter bins, information boards and fences – all these elements ensure comfortable relaxation for children, their parents and caregivers.

The modern and aesthetically pleasing design of street furniture harmoniously blends in with the playground equipment.

Characteristics of the PARK series:

Galvanised steel construction

Wood construction

Galvanised anchors

HDPE panels

HPL panels

UV printed dibond

Colour & material options*:

Colour (panels):

- C1 HPL - RAL6000
- C2 HPL - RAL3000
- C3 HPL - RAL5024
- C6 HPL - RAL1017
- C9 HPL - wood pattern
- C12 HPL - RAL7038
- C11E HDPE - multicolour
- C12E HDPE - grey/black

Construction:

- Painted steel
- Stainless steel

Anchoring:

- Robinia wood
- Surface
- Deep

*Material options apply to selected products, for more information visit: www.vinci-play.com

Legend

Colour variants

Facilitated access for children with disabilities

100% recycled HDPE

Reinforced belt fabric

Carousel platforms made of HPL

Polycarbonate (PC) panels

Composite panels

Composite posts

Steel construction and/or elements made of hot-dip galvanised and powder coated steel

HPL - the highest quality, water and UV resistant high pressure laminated panels or elements

Connectors, screws, washers and nuts made of stainless steel and/or galvanised steel protected with plastic caps

Polypropylene (PP) or Nylon combination ropes with steel core

Stainless steel (AISI 304 or 316)
- stainless steel structure
- stainless handrails and rods

Anchoring options:
- deep to the ground - 55 cm
- to concrete with plates - 5 cm
- to concrete with plates - 55 cm

Rubber / PP protective tops

Spinning elements

HDPE - high density polyethylene panels or elements

Stainless steel or PE tube slides

Climbing stones

Attested stainless steel chains

UV printed PC or dibond panels

Construction made of impregnated laminated wood, post dimensions: 90 x 90 mm

Steel spring 20 mm, sand-blasted, iron phosphated and double powder coated

Stainless steel or fiberglass slides with side panels made of HDPE or HPL

Tunnels made of durable, vandal-proof, double-layered material

Certified swing seats:
- Flat seats of rubber compound with aluminium insert
- Toddler seats for small children with soft gripping

Platforms and climbing walls made from anti-slip and waterproof plywood or HPL HEXA panels - effective protection against environmental factors and wear-resistant
